

One exhibition section of the "Museum of Madness" comprises a major retrospective dedicated to these two artists. On display are 190 works by Antonio Ligabue, of which 12 paintings and 2 drawings hitherto unseen from private collections. The exhibition was organized by Augusto Agosta Tota, President of the Centro Studi & Archivio Antonio Ligabue in Parma. A precious opportunity to get to know what is historicized as well as to familiarize with works that have never been exhibited before, allowing oneself to be enmeshed by the art of two exponents of the Italian twentieth century who, with a hallucinated air, a sense of nature, were capable of waging a strenuous battle, even when this appeared to be lost in the fog of madness.
